a. Real drift, no attacker
fleet false alarms (%, 7-day mean)
day (after 28 days of calibration)
Static (never adapts)
Frozen-reserve screen
Alarm-rate switch-off
Signature-free, single device
Naive self-labelling
FOA (ours)
b. Boiling frog on real drift
victims compromised (%)
attacker share
20%
40%
Naive self-labelling
Signature-free, single device
Alarm-rate switch-off
Frozen-reserve screen
FOA (ours)
